

Low Emissions Development in an Era of Cheap and Abundant Fossil Fuels

October 7, 2014, 1-4 p.m.

How can we support development in ways that protect the planet from climate change in a future likely to be dominated by cheap and abundant supplies of fossil fuels?

This seminar, which is open to the general public, will explore the emerging field of Low Emissions Development Strategies (LEDS), describe how the Stockholm Environment Institute (SEI) has been working to support a variety of international LEDS initiatives and explore the significant future challenges facing these efforts.

Open to the public. Registration Required
51 Winthrop Street, Tufts University, Medford, MA 02155

Welcome

Johan Kuylenstierna,
Executive Director, SEI

Presenters

Charles Heaps, Ph.D.
Center Director, SEI
How SEI is supporting
Low Emissions
Development Planning
around the World

Ujjayant Chakravorty,
Professor of Economics
Tufts University
Energy and Poverty

Sivan Kartha, Ph.D.
Senior Scientist, SEI
Equity and Low
Carbon Development

Michael Lazarus
Senior Scientist, SEI
Climate Change
Mitigation and
Fossil Fuel Lock-in

The presentations will
be followed by a panel
discussion and Q&A.
